Florida Homeschool Association

FloridaHSA

FLHSAorg

Statewide Information | Individualized Support
Serving the needs of modern families

The Florida Homeschool Association (FLHSA) was founded as a way to support modern homeschool families during a time of expansive growth and emerging needs. We help welcome new families to home education by offering friendly, safe places to ask questions and by providing factual information and real support. Our members may choose to expand access to our resources by subscribing to our membership portal, where we offer advanced levels of training and interaction with our experts. Inside our forums, and across all of our offerings and events, we are committed to academic freedom, supporting excellence and rigor, recognizing emerging trends as they impact home education, and delivering the most current information our ever-changing membership requires. A secular inclusive community, we invite all Florida families to link arms, as we share common goals in supporting our children, and leading them toward happy and successful futures.
